MARCH MEETING
Joint meeting with the CMU geology students
MARCH 18, 2015
7:30 PM
SACCOMANNO LECTURE HALL
(In the Wubben Science Building)

Dr. Julia McHugh, Curator of Paleontology, Dinosaur Journey

Will speak on

"The Permo-Triassic Mass Extinction, An Amphibian Success Story"

ABSTRACT

Temnospondyl amphibians are a diverse group of early tetrapods that exhibit a wide range of body sizes (~10cm to 6m or greater in body length) and habitats (aquatic, semi-aquatic and terrestrial); the group's abundant fossil record ranges from the Middle Mississippian to the Early Cretaceous and can be found in sediments on every modern continent. The group's diversity and abundant fossil record presents the opportunity to study the effects of large environmental crises, such as the Permo-Triassic Mass Extinction, as well as adaptations in bone histology with regards to ecology and also evolutionary history.

GUESTS ARE ALWAYS WELCOME

GJGS PAID UP MEMBERS 2015
AS OF 3/1/15

Allin, David
Allison, Larry
Baltzer, Ed
Barkley, Dick
Brandt, Laurie
Brumbaugh, Dick
Burch. Chuck
Cassin, Lee
Cavanaugh, Tom
Chenoweth, Bill
Cohan, Bill
Cole, Rex
Cotter, Ed
Cumella, Steve
Daub, Gerry
Fandrich, Joe
Fuiki, Larry
Galloway, Mike
Gibbs, Frank
Glover, Nancy
Goodknight, Craig
Hase, Skip
Hollingsworth, Stew
Hood, Bill
Hood, Sandy
Johnson, Brann
Johnson, Jim
Johnson, Verner
Jones, Charles
Jones, Larry
Kautz, Randall
Kirgan, Bob

Kirkham, Kirk
Kolb, Ed
Krey, Max
